# **Critical Issues of The American Civil War**

## **Part Four:**

### **What Unanswered Issues and Questions Still Remain?**

**Running Time: 16:38**

The battles may have ended in 1865, but some of the important issues that were fought over at a terrible cost still remain unresolved. To some Americans, many of these issues are still of great importance and require the continued attention of lawmakers and politicians, as well members of society that still call for corrections to laws or governmental programs.

This program raises the following questions, however new ones can be expected to arise with each passing generation

What is the symbolic importance of a flag?

Why is this question an important issue for some Americans?

What is your state flag?

What does it symbolize?

Can you explain the idea of “States Rights?”

How does the Constitution deal with the issue of “States Rights?”

Can you explain the difference between “Jim Crow” laws and “defacto” segregation?
